

What size DANCE FLOOR do I need?

It can be confusing to figure the proper size dance floor. We use the standard formula - 33% of your guests will dance at one time. We try to keep things simple for you while you plan your event, so simply divide your total guest count by 3 and use that chart below to figure the size that is appropriate for your event.

8 x 8 = 4 pieces = 14 people

8 x 12 = 6 pieces = 20 people

12 x 12 = 9 pieces = 32 people

12 x 16 = 12 pieces = 42 people

16 x 16 = 16 pieces = 56 people

16 x 20 = 20 pieces = 70 people

20 x 20 = 25 pieces = 88 people

20 x 24 = 30 pieces = 106 people

24 x 24 = 36 pieces = 128 people

24 x 28 = 42 pieces = 149 people

24 x 32 = 48 pieces = 170 people

Additional configurations are available. If you require a custom size please call us and one of our Rental Consultants will be glad to assist you in figuring which size and set up will work best for you
